

Specialist English: Assignment 3

J. L. Smith

Last updated: November 26, 2018

Problem 1

- There is no space between “MapReduce” and the citation “[...]”.
- There is no space between the citation “[...]” and “is”.
- There is no space between “Engineering” and “(CBSE)”.
- There is no space between “HLBPR:” and “A Hybrid ...”.

Problem 2

- The abbreviation “et al.” means “and others”, but there is only one other author(not “others”).

Problem 3

- There should not be a space between “ $\mathbf{x_u W_u}$ ” and the comma.
- There should be a period after

$$\sum_i h_{ui} \times h_{vi}.$$

- There is no need to use colons in this snippet.

Problem 4

- We should use “151 ms” throughout this snippet consistently.

Problem 5

- There should be a space between “goals:” and “(1)”.
- There should be a space between “(2)” and “To test ...”.
- We need an “and” before “(4)”.
- The best choice is “(a)”, etc.

Rewrite this paragraph:

We design the experiment with 4 goals: (a) To evaluate how our proposed algorithm performs compared with other base-line algorithms; (b) To test how different features we considered affect the recommendation performance; (c) To examine how different ranking functions affect the results; and (d) To consider how new challenges like the recommendation length restriction and recommendation overload affect the performance of our algorithm.

Problem 6

- We should not use “int” in the pseudocode, since it is a notation used in programming.
- We should not use the computer notation “==”.
- We should not use the computer notation “++”.
- We use “Set *layer_no* \leftarrow 0” instead of “int *layer_no*=0”
